ACST-2: Now we need to complete recruitment

ACST-2 has become the highest recruiting carotid

intervention trial in the world.

We need to keep working to reach our target of 3600 by the end of 2019. Thank you all for your hard work. We are delighted to announce that the ACST-2 centre recruiting the record-breaking patient **2503** was... ATTIKON UNIVERSITY HOSPITAL

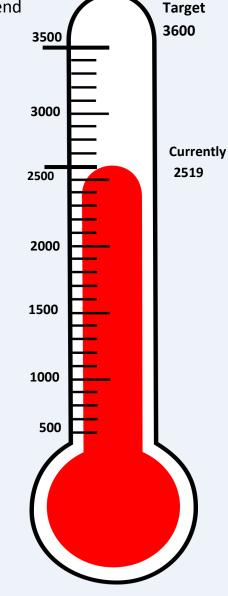

Professors Kakisis, Vasdekis and Geroulakos with Alison and Richard at the 66th ESCVS Meeting

Congratulations, and we hope you all enjoy the celebratory hamper!

Keep randomising. Our next target is 2600!!

Collaborators' Meeting September 2017

Join us at St Anne's College in Oxford for the 5th ACST-2 Collaborators' Meeting! 4th and 5th September 2017

With our planned ACST-2 update, we have planned an exciting educational program at St Anne's College <u>and</u> a Gala Dinner in the world-famous Divinity School.

Topics will include: The new simple Stroke Risk model for asymptomatic carotid stenosis; Results from German and Swedish vascular registries; Late-breaking results from the latest Oxford mega-trial in lipid-lowering therapy; the importance of Stroke in the Global Burden of Disease study; Carotid disease and dementia; and the latest results and developments in carotid stenting.

Keynote lectures will be given by Peter Rothwell and Richard Peto followed by dinner and prize giving at the Divinity School.

The Divinity School is the grandest room in the original Old Bodleian Library .

Convocation House and Chancellor's Court were added to the Divinity School in 1637 to provide a distinguished meeting place for the University's supreme governing body.

Completed in 1488, the Divinity school is a masterpiece of English Gothic architecture with a magnificent stone carved ceiling.

Designed to impress, it is still used as Oxford University's oldest teaching and examination room.

In several Harry Potter movies it was the Hogwarts Infirmary!
